Summary

Computer Science and Statistics graduate from the University of Toronto with industry experience in full-stack and mobile development, and growing specialization in AI/ML and Cybersecurity/IT. Experienced in building scalable applications, REST APIs, and automated testing systems. Recently completed the **PyTorch for Deep Learning Professional Certificate** and the **Google Cybersecurity Professional Certificate**. Currently completing the **Google Cloud Cybersecurity Professional Certificate**.

Education

University of Toronto

Sep 2021 - Apr 2026

Honours Bachelor of Science (HBS), Computer Science (Co-op) & Statistics

Degree Conferred: June 2026

Technical Skills

Languages: Python, Java, C, C#, TypeScript, R, Dart, HTML, CSS, JavaScript, SQL

Frameworks: React, Node.js, ASP.NET MVC, Flutter, REST APIs, Automated Testing

AI/ML: PyTorch, Neural Networks, CNNs, Tensors

Databases: Supabase, Firebase

Tools: Git/GitHub, Jira, JMeter, Figma, Docker, Postman, Microsoft Office (Word, Excel, PowerPoint)

Google Suite: Gmail, Google Docs, Google Slides, Google Sheets, Google Forms, Google Drawings, Google Drive, Google Meet, Google Calendar, Google Sites

Operating Systems: Linux, Windows, MacOS, ChromeOS

Cybersecurity: Computer Security Incident Management, Cyber Threat Intelligence, Endpoint Detection and Response, Hardening, Vulnerability Management, Incident Response, Security Awareness, Network Protocols, Network Security, TCP/IP, DNS, VPNs

Experience

WinMagic Corp — Junior Mobile App Developer Intern

May 2025 – Aug 2025

- Developed and maintained mobile application features using **Flutter** and **Dart** for WinMagic's MagicEndpoint platform.
- Built responsive UI components and integrated **RESTful APIs** to support secure communication with backend services.
- Investigated production issues through log analysis, debugging, and root-cause analysis, improving application reliability and user experience.
- Contributed to architectural discussions and feature planning focused on scalability, maintainability, and performance.
- Created and maintained technical documentation and participated in Agile/Scrum meetings throughout the development life-cycle.
- Collaborated with developers, QA analysts, designers, and product managers to deliver features and resolve issues.

Doxim — QA Analyst Intern

Jan 2025 – Apr 2025

- Developed and maintained **150+ automated JMeter API test cases** supporting regression testing efforts.
- Executed manual and automated testing to validate application functionality, integrations, and user workflows.
- Identified, documented, and tracked defects, to improve software quality.
- Analyzed test results and prepared reports communicating QA status.
- Contributed to test planning, release validation, and continuous improvement of QA processes.

WinMagic Corp — Junior Software Developer Intern

May 2024 – Aug 2024

- Developed and maintained features for WinMagic's SecureDoc data encryption platform using **C#, ASP.NET MVC, React, and Flutter**.

- Implemented frontend and backend functionality while following established coding standards and best practices.
- Investigated and resolved application defects reported by users and QA teams through debugging and troubleshooting.
- Participated in architecture and design discussions to support scalable and maintainable software solutions.
- Documented development changes using **Jira** and **Perforce** and contributed to Agile development workflows.
- Collaborated with cross-functional teams, including developers, testers, and product managers throughout feature development and release cycles.

Projects

Campus Compass — Full-Stack Application [Source Code](#)

May 2025 – Aug 2025

- Built a platform for managing university events and recruitment posts.
- Developed features using **React**, **Node.js**, and **Supabase**.
- Followed Scrum workflows, PR reviews, and modular architecture practices.

Registration Portal — Acton Institute of Computer Science [Source Code](#) / [Live Demo](#)

Jun 2023 – Aug 2023

- Built an online registration system supporting **300+ users**.
- Implemented using **React**, **TypeScript**, and **Firebase Firestore**.
- Followed Git-based workflows and iterative development with client feedback.

VenU — Unified Room Booking Platform (Research Project) [Prototype](#) / [Publication](#)

May 2025 - Present

- Designed a unified platform to centralize fragmented university room booking systems across multiple services.
- Conducted usability analysis to identify pain points in existing booking workflows and improve accessibility.
- Developed interactive **UI/UX** prototype using **Figma** to demonstrate streamlined booking experience.
- Collaborated in a team of 6 to research, design, and present findings at an undergraduate research symposium.

Apache Superset — Open Source Contribution [Pull Request](#) / [Issue](#)

Oct 2025 – Nov 2025

- Fixed UI/UX issue related to table export behavior in Superset.
- Designed UI improvements and submitted a production-ready pull request.

Teaching & Leadership

Teaching Assistant (Head TA), University of Toronto

Jan 2024 – Apr 2026

- Led teams of up to **15+ TAs** and supported **1000+ students**.
- Delivered tutorials, held office hours, and maintained automarking systems.
- Received the [UTSC Department Wide Teaching Assistant Award](#) for CSCA48 in 2024-2025

Director of Computer Science, AMACSS

Oct 2025 – Apr 2026

- Organized academic review sessions and coordinated with faculty.

Certifications

- **Google Cybersecurity Professional Certificate** ([Certificate](#))
- **Google AI Professional Certificate** ([Certificate](#))
- **PyTorch for Deep Learning Professional Certificate** (Pending Certificate)
- IBM SkillShare: AI Literacy, Cybersecurity Fundamentals, Project Management Fundamentals, User Experience Design Fundamentals
