Summary

Computer Science and Statistics student with industry experience in full-stack and mobile development, and growing specialization in AI/ML. Experienced in building scalable applications, REST APIs, and automated testing systems. Currently completing the **PyTorch for Deep Learning Professional Certificate**.

Education

University of Toronto

Sep 2021 – Apr 2026

Honours Bachelor of Science (HBS), Computer Science (Co-op) & Statistics

Technical Skills

Languages: Python, Java, C, C#, TypeScript, R, Dart

Frameworks: React, Node.js, ASP.NET MVC, Flutter

AI/ML: PyTorch, Neural Networks, CNNs, Tensors

Tools: Git/GitHub, Jira, JMeter, Supabase, Firebase, Figma

Other: REST APIs, Automated Testing, Linux

Experience

WinMagic Corp — Junior Developer Intern

May 2024 – Aug 2024; May 2025 – Aug 2025

- Developed full-stack and mobile features using **C#, React, ASP.NET MVC**, and **Flutter (Dart)**.
- Built responsive UI components and integrated with **RESTful APIs**.
- Debugged production issues, analyzed logs, and improved system stability.
- Participated in system design discussions focused on scalability and performance.
- Collaborated with cross-functional teams in Agile workflows.

Doxim — QA Analyst Intern

Jan 2025 – Apr 2025

- Built and maintained **150+ automated JMeter test cases** for performance and regression testing.
- Identified and reported defects, improving product quality.
- Contributed to QA planning and release validation processes.

Projects

VenU — Unified Room Booking Platform (Research Project)

May 2025 - Present

[Prototype](#) / [Publication](#)

- Designed a unified platform to centralize fragmented university room booking systems across multiple services.
- Conducted usability analysis to identify pain points in existing booking workflows and improve accessibility.

- Developed interactive UI prototype using **Figma** to demonstrate streamlined booking experience.
- Collaborated in a team of 6 to research, design, and present findings at an undergraduate research symposium.

Campus Compass — Full-Stack Application

May 2025 – Aug 2025

[Source Code](#)

- Built a platform for managing university events and recruitment posts.
- Developed features using **React**, **Node.js**, and **Supabase**.
- Followed Scrum workflows, PR reviews, and modular architecture practices.

Registration Portal — Acton Institute of Computer Science

Jun 2023 – Aug 2023

[Source Code](#) / [Live Demo](#)

- Built an online registration system supporting **100+ users**.
- Implemented using **React**, **TypeScript**, and **Firebase Firestore**.
- Followed Git-based workflows and iterative development with client feedback.

Apache Superset — Open Source Contribution

Oct 2025 – Nov 2025

[Pull Request](#) / [Issue](#)

- Fixed UI/UX issue related to table export behavior in Superset.
- Designed UI improvements and submitted a production-ready pull request.

Teaching & Leadership

Teaching Assistant (Head TA), University of Toronto

Jan 2024 – Apr 2026

- Led teams of up to **10+ TAs** and supported **1000+ students**.
- Delivered tutorials, held office hours, and maintained automarking systems.

Director of Computer Science, AMACSS

Oct 2025 – Apr 2026

- Organized academic review sessions and coordinated with faculty.

Certifications

- **PyTorch for Deep Learning Professional Certificate** (In Progress)
- AI Literacy
- Cybersecurity Fundamentals
- Project Management Fundamentals
- User Experience Design Fundamentals
